## Quality Dictionary - Definitions, Terms and Acronyms

(إهداء مهنتس / مجدي خطاب)

### Sample Sign Test-1

Test the probability of a sample median being equal to hypothesized value

(H<sub>0</sub>: m<sub>1</sub>=m<sub>2</sub>=m<sub>3</sub>=m<sub>4</sub> (null hypothesis)  
(H<sub>a</sub>: At least one is different (alternate hypothesis)

### Sample t Test-2

Sample t Test: The two sample t-Test is used for testing hypothesis about - 2 the location two sample means being equal

Sample t Test: The one sample t-Test is used for testing hypothesis about - 1 the location of the sample mean and a target mean being equal

### 3P

A 3D model of TQM, having People, Product and Process as the 3 axis  
For Implementing TQM, all the 3 parameters should be improved

People: Satisfaction of both Internal and External customer .1

Product: Conforming to the requirements specified .2

Process: Continuous Improvement of all the operations and activities is at .3 the heart of TQM

### Laws of Lean Six Sigma 5

Laws of Lean Six Sigma have been formulated to provide direction to 5 improvement efforts. The laws are a conglomeration of Key Ideas of Six Sigma and Lean

Law 0: The Law of the Market - Customer Critical to Quality defines quality and is the highest priority for improvement, followed by ROIC (Return On Invested Capital) and Net Present value. It is called the Zeroth law as it is the base on which others are built.

Law 1: The Law of Flexibility - The velocity of any process is proportional to the flexibility of the process

Law 2: The Law of Focus - 20% of the activities in a process cause 80% of the delay. (Related to Pareto Principle)
